💼 PROFESSIONAL SUMMARY

I am a software engineer. I have hands-on experience in full stack web development, mobile application development, and software engineering. My greatest strength is my ability to analyze complex problems and design efficient solutions. I possess excellent communication skills that help me collaborate effectively with other teams and stakeholders to ensure successful project completion.

My biggest achievements include developing an internet banking system for a major bank which reduced their processing time by 20%, and creating a mobile application for tracking employee attendance that increased efficiency by 25%. My skills include strong knowledge of object-oriented programming, database management, and problem-solving. I am also highly proficient in HTML5, CSS3, JavaScript, jQuery, AngularJS, ReactJS, Node.js, MongoDB, AWS services and .NET framework.

💼 EXPERIENCE

2024 - Now

As a Front End Web Developer.

Creating and implementing user-friendly and visually appealing websites. I am proficient in HTML, CSS, and JavaScript, and have a strong understanding of responsive design and cross-browser compatibility. I have also worked with various frameworks such as Bootstrap and jQuery to enhance website functionality.
